

Immunization Policy

Our practice is dedicated to providing thoughtful, evidence-based care in a supportive and respectful environment. We understand that decisions about your child's health care are deeply personal, and we are here to partner with you every step of the way.

Maintaining a fully immunized population helps protect everyone in our community. For this reason, our office requires that all patients receive all school-required immunizations according to the South Carolina Department of Health guidelines.

We are open to reasonable vaccine spacing plans, if there is a clear commitment to completing all required immunizations as demonstrated by completing inoculations at each wellness visit.

At a minimum, we expect our patients to begin immunizations by age 6 months and receive a minimum of one vaccine at each wellness visit and have received all school-required immunizations by age 5 and school-required booster vaccine(s) at age 11.

While we strongly recommend additional vaccines that provide important protections-including influenza, COVID-19, HPV, and meningitis vaccines- these are not required under our office policy.

Patient Name: _____

Date of Birth: _____

Patient Name: _____

Date of Birth: _____

Patient Name: _____

Date of Birth: _____

By signing below, I acknowledge that I have reviewed the full vaccine policy on the practice website or requested a copy in the office, and I agree to follow these immunization guidelines for the patient(s) listed above.
